

Следуя инструкции развернул AWX

<https://github.com/ansible/awx/blob/devel/tools/docker-compose/README.md>

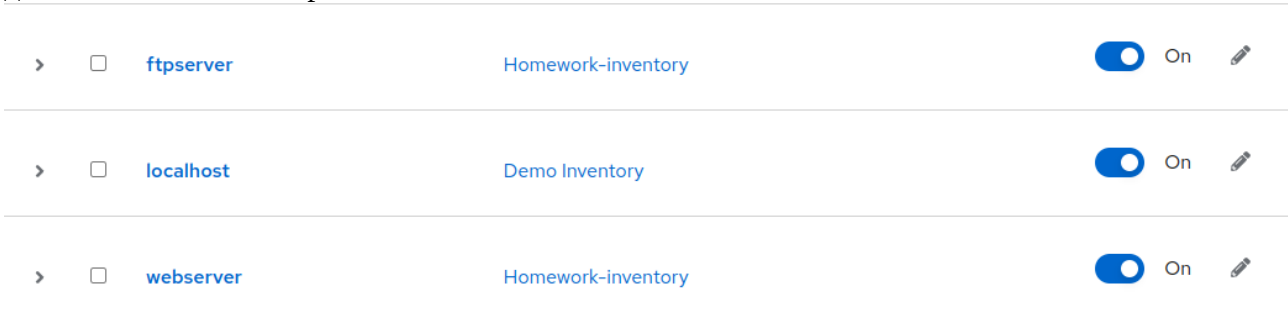

потом перешёл на адрес своей виртуальной машины

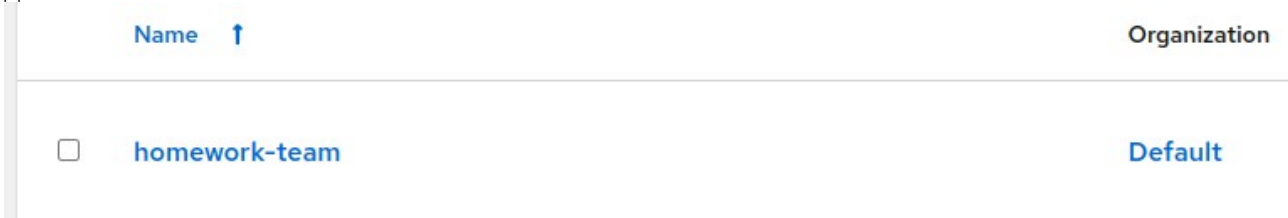

залогинился, создал homework-inventory

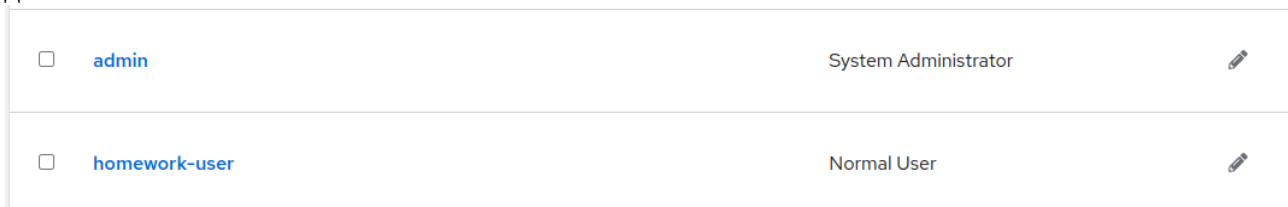

добавил webserver и ftpserver в hosts

добавил Team

добавил User

далее Credential

	Name ↑	Type	Actions
<input type="checkbox"/>	Ansible Galaxy	Ansible Galaxy/Automation Hub API Token	
<input type="checkbox"/>	Demo Credential	Machine	
<input type="checkbox"/>	homework-credential	Machine	

project связал со своим <https://github.com/devops-igor/epam-ansible-homework.git>

	Name ↑	Status	Type	Revision	Actions
> <input type="checkbox"/>	Demo Project	<span>Successful</span>	Git	347e44f	
> <input type="checkbox"/>	homework-project	<span>Successful</span>	Git	8a3b0e9	

создал template

Name \*

homework-template

Description

Job Type \* ?

Run

☐ Prompt on launch

Inventory \* ?

☐ Prompt on launch

Project \* ?

Execution Environment ?

Playbook \* ?

lesson3/httpd\_vsftpd\_playbook.y...

Credentials ?

☐ Prompt on launch

SSH: homework-cred...

и запустил его

homework-template Successful
